

INDEX TO VOL. II. PART II.

A.
Agriculture, 487, 504, 696, 697, 712, 727, 743, 759, 776, 808

Address to Subscribers, 625, 656, 689, 737, 785
Arches in Bridges, reasons why several have been sustained without regard to the true theory of construction, 690
Architecture, the Orders of, 423, 534, 614, 758, 824

B.
Badnall on Undulating Railways, 568
Bed for Invalids, 681
Booksellers in England—Combinations among, 680
Bobbin-net Trade in England, account of, 472
Blacking, Receipt for Making, 487
Brown's Method of Moving Brick Houses, 435
Bridge, Iron one proposed by A. Canfield, 483
Bulkley on Guard Rails, 434

C.
Canal Navigation on Rafts, 421—New-York and Ohio, 497—Wabash and Erie, 545—Delaware and Hudson, 801, account of Traffic on, 565—Miami, 644—Chemung, 689—Pennsylvania, 721—Comparative View of Expense of Transportation on, and Locomotive Carriages, 738—Convention on, 773—Commissioner's Report in Pennsylvania, 801
Canal Fund, (Chenango,) 53
Canal Tolls, account of Receipts on, 569
Carriages, Improved Method of Propelling, Saxton's Patent for described, 722
Cement, Fire Proof, method of making in France, 425
Cement or Artificial Stone, method of making described, in Ranger's Specification of his Patent, 724

Character and Integrity, Importance of in Trade, 583
Chinese Kalendar for 1833, 678
Chloride of Soda, 681
Chemistry, History of, 423
Cholera on Red River, Lou., 433, 484
Chronometers, Results of Experiments on various ones, made at the Royal Observatory in England, 451
Congress, List of Members, 688
Columns, Scale for Graduating of, 647
Combinations among Workmen and Masters against each other, evil effects of, 598, 663, 679, 680, 668
Cocoons, market for, 421
Color for Rooms, method of preparing, 425
Consumption, use of Chloride of Lime in curing, 536
Connecticut, Statistics of, 568
Cooking by Gas Flame, Mallet's Apparatus for, described, 806
Clock, Vocal one, account of, 543
Cryptography, or method of Secret Writing described, 678
Curious Facts and Experiments, 692
Cuvier, Anecdote of, 465
Curves for Arches, on the Construction of, 530, 593, 690

D.
Drawing Machine, invented by G. Lansing, 534
Draining, Machine for, 631
Dredging, Machine for, 631

E.
Egg Oven, Egyptian one described, 646
Education, Benefits of, 682

F.
Facts in Physics, 425
Factories on a large scale, Causes and Consequences of, 552
Foreign News, 427, 443, 476, 492, 507, 524, 540, 557, 588, 604, 620, 622, 652, 684, 716, 732, 764, 780, 800, 812
Franklin Benjamin, Anecdote of, 486
Fuel, method of economizing in private dwellings, 791

G.
Gearing Chain, account of, 519

Glass Plate, Comparative Prices in London, in the years 1771, 1794, and 1832—in Berlin, 1828—in Paris, 1825—method of making described, 471—Dimensions and Price of the largest size made in London, 485

Gold Leaf, how manufactured, 485—Price sold at in London, 485
Gold Chains, Relative Value of in Venice and England, 485

Grain, Machine for cutting, 665
Guesney's New System of Philosophy, 632
Gauge for Measuring Casks when standing described, 520

H.
Hamilton's Sawing and Boring Machine, account of, 425
Hat Making, account of the process of clearing Fur for, 630
Hemp Machine for Spinning, Waterman's Improved Plan, 662

Height of Buildings, simple method of ascertaining, 423
Hook's Universal Joint, account of, 631
Home Intelligence, 428, 444, 460, 476, 493, 508, 525, 541, 557, 573, 589, 605, 621, 636, 652, 668, 685, 700, 717, 733, 748, 765, 814
Hunt's Globe Stoves, 663
Hydraulic Dry Dock in New-York, account of, 521

I & J.
Incombustible Wash and Stucco White Wash, 521
Internal Improvements in Virginia, 547—generally, 722, 754, 773, 802
Invention, Progress of Exemplified, 565
Iron Bridge, (Canfield's,) 483
Iron, Bar, comparative Price of in France, in England, Sweden, Russia, and Belgium, 502—Process of Silvering of, 521—American Iron, 549—Effects of burying it and Steel in the earth, 726
Jackson President, his Message to Congress, 777

L.
Laborers, co-operative ones, a Society proposed, in which they should form the capitalists, 471
Labor, on the Division of, 502—Economy of in large Manufactories, 502—its General Advantages, 502—Promotes the Invention of Labor Saving Machines, 503—Advantages of illustrated in Pin Making, 505
Lime, its importance in the Cultivation of Wheat, 568—description of, 582
Locomotive Engine in Pennsylvania, 542, 691—on common roads, 708, 739—Performance of one greatly loaded at Petersburg, 739—Tables of Performances of one calculated by Col. Long, 772, 785

M.
Machine for moving a given weight with a given power, 566—and its Model, remarks on, 422—in which all the Mechanic Powers are combined, 441
Machinery, Hints for the Preservation of in good order, 646—on the Duration of, 648—frequently hired out in England, 648—Hints for Packing of with safety, 617—on the exportation of, 809, 825
Marble, Method of Sawing of by Machinery, described, 470
Manufactures, Capabilities of Machinery to increase, 483—Separate Account of each Process, 551
Manufacturing too much Stock, Effects of, 599—things necessary to inquire into before commencing, 599
Map of all the Railroads in America, announced, 513
Mechanics in China, 828
Mechanical Quadrature of the Circle, 828
Mental Labor, Division of, 550
Meteorological Record kept in New-York city, 441, 469, 501, 600, 640, 649, 672, 720, 729, 745, 784
Meteorological Record kept at Avoylle Ferry, Red River, Lou., 440, 501, 601, 640, 720, 784
Microscope, Wonders of, 710
Mildew, Notes on by Dr. Lindley, 568
Mount Auburn Cemetery, account of, 518

N.
Natural Wonder, described, 647
Naval Lyceum, proposed formation of, 800
New Era of Steam Power, 822
News of the day, Foreign, 427, 443, 476, 492, 507, 524, 557, 588, 604, 620, 622, 652, 684, 716, 732, 764, 780, 800
News of the day, Domestic, 428, 460, 476, 493, 508, 525, 541, 556, 573, 589, 605, 621, 636, 652, 668, 685, 700, 717, 733, 748, 765
Newspapers first written in England, 502
Notes of a Tour through the United States, by "H.," 698, 753, 781
Notice to Subscribers and others, 626

O.
Omnibus (Locomotive,) on Common Roads, account of Mr. Hancock's Experiments with, 659

P.
Patents recently granted in England, List of, 537
Paddle Wheel, new one, 549
Parley's Magazine, Notice of, 513
Pipes, Lead Tinned ones, 631
Philosophy, New System of, by M. Guesney, 632
Philadelphia, City of, Improvements in progress, 601
Pin Making described, 503—Comparative View of in France and England, 504—in America, 550
Pigeons, some fancy ones, 473
Plough, Draining one, 631
Post-Master General, Report of, 798
Price, on the Influence of Verification of, 438—Instances of in Sugar, 438—in Tea, 438—in Clover, (method of deteriorating,) 438—in Flax, both Irish and Scotch, 438—in Drugs, 438—Variation of by Competition, 438—Ice and Camphor, 439—on the Durability of as regards Manufactured Articles, &c. 439—Effects of Public Opinion on, Instance in case of Cajeput Oil, 439—Scale of Cash Prices for various articles in Birmingham in the years 1818, 1824, and 1830, 439—another Scale, for 1812, and 1832, 439—Causes of the Diminution of in England, 440
Practical Science, Natural Gallery of in England, account of, 774
Pump, Hot Water one, account of, 597—Rotary one, 613

R.
Railroads—
Advantages of to Chicago, 673—generally, 765
Albany and New-York, 417
Allegany Portage, 564
Baltimore and Ohio, 673, 736, 771, 785, 786—Report of, 803
Boston and Worcester, 529
Boston and Providence, 692, 756
Bristol (England) and London, 712
Brooklyn and Jamaica, 449, 580
Camden and Amboy, 417
Canada, 517
Central one, 466
Comparative Accidents on, and Steamboats, 722
Comparative view of Expenses on and by Canals, 738
Cost of Transportation on, 420, 442, 465
Dansville and Rochester, 562
Delaware and Susquehanna, Report of, 497, 515
Elizabethtown and Somerville, 433, 451, 497
Florida, 517
Georgia, 562
Grand Junction one, 626
Improvements on, by Wm. Jessop, 740
In Ohio, Erie and Mad River, 433, 514, 642, 644
Ithaca and Owego, 500, 562, 577, 578, 584, 595, 803
Liverpool and Manchester, 564, 705
New-York and Erie, 417, 425, 465, 737, 758
Paterson one, 773
Petersburg, 529
Philadelphia and Baltimore, extracts from Report of, 498
Port Kent and Keeseville, 517
Portsmouth and Roanoke, 516, 593

Railways—

Rensselaer and Saratoga, 481
 Richmond and Potomac Creek, 561
 Saratoga and Schenectady, 417, 484
 South Carolina, 531, 805, 817
 Southern ones, 724, 753
 Southern Counties of New-York, Convention of, 760
 Stonington and Providence, 789
 Suspension one, 738, 785, 820
 Tonnewanda, 561, 593
 Tusculum, Courtland, and Decatur, 467, 481—Oxford, 481
 Undulating ones, 594, 612, 626, 627, 628, 629, 674, 753, 768, 770, 785, 789
 Utica and Schenectady, 417
 Virginia, 689
 Winchester and Potomac, 577
 Wooden ones, by Mercator, 436—Observations on, by J. L. Sullivan, 453, 484, 497, 498, 539
 Railroad Waggon, Improved Wheel for, by Mr. Jer-vis, 452
 Railways, descriptions of by Mr. Bulkley, 434, 498, 610
 Railroad Turnout, Plan for, 770
 Rational Amusement, 648
 Raw Material, Value of in France, 485, 502—in Belgium, Russia, and England, 502

Rain, Objections to the received Theory on, 694—those objections examined, 755
 Reviews of the week, 426, 442, 458, 474, 490, 506, 522, 538, 554, 570, 586, 602, 618, 634, 650, 666, 682, 698, 714, 730, 746, 762, 782, 810, 829
 Rivers, importance of large factories being situated near them, 598
 Rifle, Lambert's, in the form of a walking cane, described, 632
 Roads, track ones, (Williams' and Hartman's) 545—pretended McAdamized ones in New-York city, 629, 661—in England, 657, 660, 674
 Road Making, Proposed Improvements on, by using timber, 450
 Rutter's plan of burning Water instead of Fuel alluded to, 689, 690

S.

Sawing and Boring Machine, Hamilton's, account of, 425
 Sea Serpent Harpoon, account of, 565
 Secretary of the Navy, Report of, 794
 Secretary of War, Report of, 793
 Silk, Manufacture of in Boston, 613, 649
 Smoky Chimneys, 828
 Steam, first application of to a useful practical purpose, 522—first used as a toy, 582—simplified application of, 437—new application of, 598—pretensions of an anonymous advertiser stated, 691

Steamboat Safety Apparatus, proposed plans, 484, 517, 692, 742
 Steam Carriage Company in London, 612—on Common Roads, 708
 Steam Engine, Locomotive one, account of on Saratoga Railroad, 468—Rotary one, by S. Fairman, 547—Another, by Earl Dundonald (Lord Cochrane,) 577—Ancient Greek one, 646—Heaton's Locomotive, 677—Apparatus for stopping and levelling described, 694
 Steam Boiler Deposits, 449
 Steamboat, Fulton's first one described, 583—on the Susquehanna, 584—Burden's, 605, 789, 822—with paddles in the stern, 691—observations on Symington's Plan, 707
 Steamer for family purposes, 520
 Spider, ingenuity of, 631
 Straight Edges, importance of to workmen, 471
 Stoves, Hunt's Patent, 662
 Stereotyping first invented in America, 486
 Striking for more or less wages, among men and their employers, evils of, 664
 Steel, effects of burying it and iron in the earth, 692, 742
 Sullivan on New-York and Erie Railroad, 425, 498

T.

Trees, superior composition for promoting growth of, 665
